

How to netplay ReworkPoFV Patch

1. You will need Touhou PoFV.
2. Adonis2 is mandatory: <https://maribelhearn.com/mirror/PoFV-Adonis-VPatch-Goodies.zip>
3. To download this patch, you need Thcrap:
https://www.thpatch.net/wiki/Touhou_Patch_Center:Download
4. Run thcrap.exe click [Next >] and then [Advanced Mode...]. Then add our patch and any language you want, example:

(ignore different description of patch here)

5. The next option is to choose Touhou PoFV. If it isn't visible, you need to choose the Touhou PoFV folder and then choose the location of your shortcut (which will be used to launch the game).
6. After it's finished, open "thcrap\config\games.js" in any text editor.
7. Rewrite "th09" to "adonis2e.exe" at the end. For instance:

```
{  
  "th09": "../adonis2e.exe",  
  "th09_custom": "../custom.exe"  
}
```

8. With this patch, you can now play Touhou PoFV, but be warned that Adonis2 will launch first each time the game is launched, meaning that single-player game will no longer work for that instance of thcrap.
9. Everything else is the same as in standard Touhou PoFV netplay.
